Clarification of Data Collected and its Use

In Ohio and nationally there are growing concerns about software providers and their access to student data. This document and the attached table are intended to clarify exactly what data that stemcoding.herokuapp.com does and does not have access to, and what the data we do access is used for.

1. Very minimal data is collected from students

As outlined on the attached table, our site knows the first and last name of your students and their email address as well as the data from the coding assignments that the complete on our site. We do NOT collect IP addresses (which could reveal locations), passwords or other sensitive data.

2. We do NOT sell any data

We do not sell student data for any purpose, nor do we have any ads or ad revenue from our site. The site is supported by fees paid by teachers and contracts.

3. We do not connect to any external sites that access student grade data

At the time of this writing, stemcoding.herokuapp.com is unable to connect to learning management systems such as canvas, blackboard, google classroom, etc. This being the case we do not have access to any student grade data other than the grades that the teacher assigns to the programming activities on stemcoding.herokuapp.com

4. Even when students and teachers login with google credentials, we do not access google classroom data

When students and teachers login to stemcoding.herokuapp.com using the option to login with their google credentials and even when these students and teachers are using google classroom to manage other course content, we do not and cannot access google classroom in any way and we do not and cannot obtain grade data from google classroom even in this scenario.

If there are any additional questions about student data and compliance please email stemcodingohio@gmail.com

regards,

Chris Orban
